A MESSAGE FROM THE CHAIRMAN

7D INTERNATIONAL

WELCOME TO THE 7D WORLD!

www.7dint.com

Welcome to the 7D World! It is my honour and privilege to present my message to our dear customers, partners and stakeholders. I am pleased to welcome you on these pages. I believe that this brochure will be an interesting and useful source for you. The aim of this brochure is to provide you with the most detailed information about all our current and perspective projects and our industries' activities.

7D International was founded in 1993 with a deep concern for the innovated comprehension of human environment and the need to create superior architecture. Our aims is enrich human experience and spirit by the use of modern technologies, while drawing inspirations in nature.

Our company is constantly expanding by opening new lines of business. We are looking for the opportunities of future development. With a highly qualified staff, with all the necessary resources and competencies, we have built an ideal model of the large company and divided it into several directions. 7D International endeavours to be the first choice for the customers in all of our 7 industries all over the world. The strategic goal of 7D International is to become a worldwide leader among global companies by entering new markets, diversifying business activities and ensuring the security of supply. One of the 7D International's great advantages is that it is developing in every industry simultaneously and tirelessly.

The fundamental policy of our company is based on the long-term business relationships with customers and partners. At 7D International we do believe that respect and trust are the keys to a productive cooperation that will lead to mutual prosperity of our clients and our business.

 Chairman
Dr. Wael El-Mougy

ABOUT US

7D International a.s. is a Holding company with headquarters in Czech Republic and also located in Saudi Arabia, South Korea, Egypt, Australia and represented in the USA. Our company provides full service in consulting and contracting on many diverse fields. Our market activities are ranked in wide industrial, infrastructural and selected commercial projects for public and private customers within five continents.

We provide full range of services, that are connected with civil engineering projects of all dimensions.

Through a strong commitment to a superior design, we intend to make our mark on the global stage by making significant contributions to diverse fields like architecture and environment design, aiming to improve the quality of people's lives.

7D International is eager to embody ambitious projects in architecture, civil engineering and infrastructure development and construction. Apart from city planning and zoning we are also capable of city maintenance and especially glad to have an opportunity of further city development, because not only does this makes us proud of our work, but also that way we can be sure that our solutions are properly realized and are scalable.

We couldn't achieve given goals without our employees and partners. Through the years of experience we've created a wide network of a top specialists, suppliers, producers and experts. Our personnel ensures that our customers are getting the very best service and are always prepared to meet any customers' requirements, at anytime.

WHY CHOOSE 7D INTERNATIONAL

Through our consulting we are able to provide you with the complete service from the beginning to the final project: the initial concept of the construction or reconstruction, the complex model, logical/physical model etc., finding the suppliers and solutions, revision of the process, and examination of the result.

We'd like all of our customers to receive the very best service and final products, that's why we always intend to complete the mission and objective with a personal approach and attention. Through the whole process of collaboration our highly-qualified staff is at your service 24 hours a day, 7 days all over the world.

OUR HISTORY

7D International Holding (formerly known as Pulec Holding) was founded in 1993 with a deep concern for the innovated comprehension of human environment and the need to create superior architecture. It aims to enrich human experience and spirit by combination of modern technologies and nature's inspirations.

With this strong vision, desire to achieve goals and aim to grow and expand, our company becomes the significant contractor with a generous amount of telecommunication projects at the edge of 2000s. Later on it expanded in a large international company. Under the "7D International" name it has diversified into 7 industries: Architecture and design, Civil engineering, Defense, Finance, Information technologies, Environment sustainability, Public sector and also Medical food.

Nowadays, 7D International has strong business relations with a number of partners in varied fields. Each partner brings their own experience into our company for the best result of final completion, operation and maintenance of our mutual projects thereafter.

OUR MILESTONES

The 7D International Holding has evolved from a number of different companies as follows:

1993

From "Pulec Finance and Banking" in 1993

1996

From "Aus-consult Pty Ltd" in 1996

In years 1989-1994 "Aus-consult" organized the \$80M Operation and maintenance project in Saudi Arabia, operated by "Telecom Australia International" and "Telecom Australia Saudi limited"

From "Atelier Simona, Architectural and civil construction designs", which subsequently lead to the design of Riyadh 2020 area development in 2014.

1996

From year 1996 7D International was involved in various telecommunication projects including 2G installation.

2006-2009

During these three years our company established and constructed more than 1500 base stations for 3G network.

2009-2013

In association with partners such as "PF Korea", "Saleem" and "Gawdat Group", 7D International got involved in a number of major construction projects including the most significant - King Abdullah Park Fountain.

2013

The launch of construction of second biggest project of 7D International - King Abdullah International Gardens located in Riyadh.

7D International was awarded for a number of projects for Riyadh Municipality including consultancy for Three Years Budget and Social programs.

2014-2015

7D International was awarded for consultancy of urban study for Riyadh 2020.

7D World: concept and design. Social project from 2015 for 3 years.

EXECUTIVE TEAM

DR. WAEL EL-MOUGY

CHAIRMAN

Dr. Wael El-Mougy is the founder of 7D International a.s., CEO of 7D Dream, owner of Makkah Group and General Manager of PF. He has more than 20 years experience in Business and Corporate Management.

He has the doctorate degree in management and completed many successful projects in Asia, Europe and America. His original studies are related to the computer science, however having controlled a number of companies in various industries, entitles him to be a successful entrepreneur and excellent manager in all of the industries.

He had recently become the agent of Egyptian Atomic Energy Authority, and representative of several world companies.

Right now his main interests are concentrated in Management Consulting, architecture and design industry, where he has successfully accomplished a number of major projects in Riyadh, Kingdom of Saudi Arabia.

ENG. REZA REZAI

CEO

Eng. Reza Rezaie has more than 30 years of experiences in ITC consultancy and Project Management. He has a Bachelor Degree of BE in Electrical Engineering from UNSW, and an MBA degree with Distinction from University of Heriot-Watt (EBS).

He joined 7D International in 2005 and since then he is the Chief Executive located in Sydney Australia.

His main focus is on Strategic Management, and he has formulated Strategies for major International Companies, and has helped those companies in executing their strategies with minimum drift. He also has interests in Telecommunications, IT and Aviation.

MR. EVAN SHIM

GENERAL MANAGER

As part of South Korean department of 7D international, Mr. Evan Shim, who is also the Executive Manager of Trademan Company, is the General Manager of 7D international. Mr. Shim has more than 30 years of experience in aviation trading and coaching.

He is currently the General Manager of 7D International's department 7D Fountains in South Korea. He started his career in 1977 with Korean Air line, and retired from a director position in 2004.

He has written several books on maintenance of aircrafts and associate facilities. He is a teaching professor in aerospace at Joongbu University of South Korea. He has extensive experience in Asian markets and completed various projects.

MR. PAVEL TKACIK

REGIONAL DIRECTOR FOR EUROPE

Mr. Pavel Tkacik is the Regional Manager of 7D International, who is responsible for the supervision of projects on European and Asian markets. He has over 30 years of experience in Industrial Engineering.

From 2001 until now he has been cooperating with 7D International on various projects including steel service centre, high quality steel processing and international sales and distribution.

He has executed a number of Projects in the Czech Republic and Germany and managed these projects within budget, quality and schedule. He is currently concentrating on projects for Middle East Area as well as Eastern Europe, including Russian Federation and Kazakhstan.

EXECUTIVE TEAM

DR. ZBYNEK PULEC
BUSINESS CONSULTANT

Dr. Zbynek Pulec is a founder of Pulec Holding. He has doctorate degree in physical education and had an outstanding career in that field. From 1990 to present Dr. Pulec has dedicated his time for business systems development center for Czech Central bank.

He is interested in manufacturing as well as invention and has registered numerous patents. His main specialization is concentrated on project management and logistics of projects. He brought to 7D International his 20 years experience in Project Management

DR. SAM ERFAN
INTERNATIONAL COORDINATOR

Dr. Sam Erfan comes from America, where he received his doctorate degree with distinction in international marketing and management. He has more than 27 years of experience in customer service, sales and communication and retail marketing, while he was also responsible for internet applications project organization and supervision.

He is self-motivated and experienced in management and Market development. He possesses excellent analytical skills and has a proven record of projects. In the field of civil engineering he has good knowledge of prefab building material GRP (Glass Reinforced Polymers) and GRC (Glass Reinforced Concrete), Smart Car Parking System and waste management for recycling waste to energy, fuel, and electricity.

DEBRA FRYE
U.S. REPRESENTATIVE

Debra Frye is a licensed professional realtor with 25 years of experience in the State of Florida USA for residential and commercial property. She has been a certified distressed property specialist (with a specialization in short sales, foreclosures and bank owned properties). During her career she has also been certified as a specialist in international marketing and fractional ownership.

Her business philosophy is to always place her clients' needs first. Listen, care and do her best to accomplish her clients' desires and goals with integrity, honesty and joy in work. During her career, she has been known to be a "Realtor's Realtor" - meaning other realtors have trusted her to market, list and sell their personal property. Her reputation facilitates her in the Real Estate Industry with honor.

ENG. ROMAN KUBA
CHIEF ARCHITECT

Family building tradition development continues in the work of an architect Roman Kuba who since the very beginning of his activity approves himself as an exceptional, strong, vital individual who programly quits strictly rationalistic building concept and he focuses on organic architecture being inspired by nature as a model of perfect structure, organization and beauty.

In many reconstructions as well as new buildings of bank subsidiaries, administrative buildings and family estates he works with arch, bending line, irregular curve or curvature, other times with many angled ground plans derived from natural crystalic structure.

ARCHITECTURE AND DESIGN

7D International provides a full range of services in consulting on architecture and architectural design area. We are a consulting leader on the market, offering our clients among other acoustic consultation, visualization or computer animation, especially significant is 3D design. We can also create photo realistic design on request. Onwards, we can provide you with a professional consulting for renovation of historical buildings, including interior design.

With our team of world famous architects we provide consultation in overall planning, coordination, and control of a project from beginning to completion. To satisfy our customer needs, we also operate at other activities, such as searching for land plots, co-funding of selected investment projects, land surveys and expert opinions for investment projects. In other words, our company can provide consulting of design, project documentation, pricing, placing and marketing items for buildings in all segments.

Our contracting provides all of the main services that might be demanded in the architectural projects, from the concept to conclusion: the initial concept of the construction or reconstruction, the complex model, logistics model etc., advising appropriate suppliers and solutions, revision of the process, examination the result and the onsite author approval.

Apart from civil engineering, we specialize in civil design for living buildings of private individuals or complexes of such buildings for municipality or development investment projects. As we aim for a sustainable architecture, in our projects we tend to use eco-friendly materials and technologies, using alternative sources of energy or installing such systems onsite.

7D International has excellent experience in technical and structural aspects of these transactions to help customers capture the value and save their money. We are oriented on project design and management, building engineering services and cost management. We help our clients enter the contract negotiation with proper documentation procedures.

Areas of contracting and consulting:

- Preparation of comprehensive designs
- Architects' supervision
- Interior design
- 3D design graphics
- Animation and visualization
- Sustainable infrastructure design
- Sustainable buildings design
- Eco-friendly materials and technologies
- Renovation and reconstruction
- Historical buildings and sites maintenance
- Civil design
- Volumetric design
- Land plots administration
- Funding and investments
- Financial and cost management
- Project documentation
- Providing with suppliers
- Onsite construction authority supervision
- Cost management
- Expert opinions for investment projects
- Marketing promotion
- Final examination before exploitation

CIVIL ENGINEERING

7D International is a leader for consulting of the quality construction of every kind of project such as sport centers, shopping malls, hotels, residential, offices, retail, manufacturing, schools or universities, health care centers or hospitals, and variety of multifunctional buildings. But we can also consult you upon city planning, parks or other leisure complexes; still we are also reliable in a global competence of architecture and design in most of the markets.

We are specialists with a great reputation in urban studies, zoning plans preparation and city planning; site layouts, volumetric design and civil design. 7D International can provide consulting of design, project documentation, pricing, placing and marketing items for buildings in all segments.

7D International provides you a high-quality package of services in the landscape industry consulting. We have proper experience and are equipped to execute projects of any range and at any phase of construction: from arrangement, project design and construction to renovation and final project approval. Advert to our mission, we should say, that our spectrum of services includes also consultation of structure, lightening, installation and maintenance.

In the area of waterscapes we specialize in the construction of fountains, swimming pools and bodies of water of any size and complexity. As well as in the landscape area, the complete services of consulting will be provided in every stage of project: from a concept, to fully operational site with a guaranteed component conservation. We are proud to mention, that 7D International has the ability to assist you in taking advantage of the latest techniques and technologies.

7D International has excellent skills and experience with 20 years of combined practice in the areas of landscape architecture, horticulture and cultural heritage. Most important, 7D specializes in landscape and sustainable architecture for towns and cities.

Areas of contracting and consulting:

- Project designs
- Site zoning and designing
- Urban studies
- Landscape design
- Land survey
- Earth and water works
- Waterscape design
- Lightning fountains and other water units
- Site supervision
- Street lightening
- LED technology appliance
- Water treatment systems
- Ground water harvesting systems
- City planning
- Bridge construction
- Global machinery
- Building performance evaluation
- Mining and tunnel design
- Onsite authority supervision
- Final construction approval

ENVIRONMENTAL SUSTAINABILITY

The policy of 7D International is to encourage entrepreneurs to deploy renewable energy systems wherever it is possible. We do believe, that the impact it has on the overall ecological situation is huge and obviously important. The ability to sustain a proficient and effective manufactory is what distinguish a responsible entrepreneur and his business from many others and what will definitely stand him apart in a range of competitors. Being responsible for the environment we live in is no longer a marketing campaign, but obvious responsibility.

7D International pays great attention to the ecological state of the world, which is why, the waste management is a very important part of our competence. The consulting we provide is suitable for different production and business areas, which are maintaining waste management. The households would gather from the "Organic waste" or "Compost and organics" systems. It could be installed domestically, or integrated in the local infrastructure.

"Zero Waste Energy System" is similar to Anaerobic digestion project (it is a dry anaerobic digestion system for organic waste processing). Like other dry fermentation, it is well suited for the production of biogas from stacked solid organic waste in a non-continuous batch process) in the way it is meant to embody the idea of non-waste production, in this particular way, energy production. The main focus of this project is concentrated on the harmful waste in the energy production activity.

Landfills are filling up, and diversion targets continue to grow around the world. Delivering the high throughput and recovery rates demanded by today's waste industry requires innovation, experience, and engineering excellence. Our patented Municipal solid waste sorting process separates us from the competition as clearly as it separates commodities from the waste stream. This innovation will take your business to a whole new level of profitability.

7D International also provides you the slaughter maintenance service, including slaughter lines for cattle, sheep and other meat production. Our partners develop and build cutting room solutions for the cutting up of carcasses. The solutions are always customer-specific and highly related to the number of carcasses to be processed. We offer a variety of cutting room systems, all of which comply with all applicable health and safety requirements.

Areas of contracting and consulting:

- Environmental consulting
- Renewable energy systems
- LED technologies in civil engineering
- Distribution of energy
- Organic waste management
- Industrial wastewater treatment systems
- Sole condition and erosion control management
- Municipal solid waste sorting process
- Supplying environment-friendly materials
- Industrial waste elimination
- Automated sorting systems
- Slaughter systems
- Cutting rooms
- Blood collection systems

DEFENSE AND AVIATION

7D International offers contracting with businesses that closely related to most of the industries we cover in our profile, such as logistics, IT & information management, civil engineering and technical support, communication infrastructures and alternative energy systems but it is also consisting followings areas: Maritime Services, Training and fielding, Technical training and Administrative.

We provide public services in area of Defense and particularly aviation, which includes cooperation with customers in such established systems as: Total Package Fielding, New Equipment Training, Full Foreign Military Sales services and entire professional and administrative support. Advert to military services, we should noticed and explain, that Total Package Fielding is the US Army's standard process for fielding new weapons, equipment, and other material systems. Our customers use this process to ensure that fully supportable material systems and their required support are provided with minimal disruption of the unit's day-to-day missions.

Furthermore we produce, revise, and update all required training materials and Training Support Packages to meet the needs of the customer with a choice of traditional hard copy and CD-ROM courses. One of most important things are, that we provide a full range of professional, administrative, and personnel support services for all phases of mobilization, demobilization, day-to-day operations, and assistance to states during natural disasters.

Our instructor-certified personnel provides a broad range of Information Technology technical training. Our training is provided at unit home stations, temporary duty locations and during field missions by way of Mobile Training Teams. Readiness necessitates the ability to "train on demand" by taking training and educators to the soldiers and units anywhere, anytime.

In technical industry we are always trying to keep up with the progress and the newest technical innovations. Keeping the pace is not an easy task, but this is exactly why we are the leading company in that industry. Our goal is not only to provide you with the best training or technology available, but also make sure you are satisfied with it and use the most affectivity out of it.

Areas of contracting and consulting:

- Coordinating fielding milestones
- Coordination of material introductory
- Submitting after-actions reports
- Single channel ground and airborne system
- Defense advanced GPS receiver
- Enhanced position location reporting system
- Preparing and maintaining training plans
- Developing training schedules
- Coordinating NET Team to training sites
- Recruiting and retention services
- Personnel service support
- Family operational support center
- Soldier readiness processing support
- Personnel security management
- Administrative service support
- Basic and field IT networking
- Advanced Cisco routing
- Software development and maintenance

FINANCE

7D International is the best partner for your business, whether you need a consultancy in general finance or more specific banking operations and investment. We offer you the most efficient and effective solutions to develop your business. We start from the establishment of your company through developing it on the market, operating with your finances or valuing your savings. Our company provides activity in three sectors, such as finance, banking and investments.

The first area, finance, involves finance consulting in accounting, tax records and financial services legislation. The accountancy is a vast area and because of this it includes a lot of services. For example: taxes, salaries, human resources management and broad-based legal principles. - Information systems maintenance
- Subnets suppliers contracting
- Business vulnerability eliminations
- Ready-made software solutions
- Infrastructure solution scalability and flexibility
- Enterprise data warehouses
- Data security policy improvements
- Data backups and safe storage
- Data quality management
- Information systems risk policy
- Secure remote access systems
- Information systems performance issues
- Merging diverse information systems after acquisitions
- Emergency situations on-the-site supervising and solutions
- 24/7 helpdesk support services
- Staff training and mentoring
- Elimination objectionable IT costs
- Social media mining

PUBLIC SECTOR

The newest direction of 7D International is Public services, although the framework for this sector has started to be created over years now. Our comprehension of human environment would be incomplete without giving a special attention to health and overall wellbeing of people.

The main project in this direction, that has been newly launched in April of 2015, is 7D Resort in Citrus County, Florida, USA. The resort is situated in the southern part of the bay and offers great possibility of relaxing vacation combined with leisure activities. It puts forward the exotic appeal of a tropical island getaway with the proximity and affordability of a traditional American vacation.

Medical food is also a new project that is closely related to the previous one. Medical food is particular type of medical suppliers net, concentrating on delivering prepared food according to different health or post-surgery diets to either healthcare facilities or straight to the patient's inhabitation.

Giving that Public services is the new direction for 7D International, we have already gathered an experience through several years for example in the field of medical equipment. We have a variety of trustworthy partners, that can embody every requirement of our clients in boundaries of a whole facility or just separate laboratory.

In this area we will be concentrating on the operation of our Resort and Clinic for now, while still remaining open for new opportunities in consulting and contracting such as: wellness facilities, resorts and leisure activities, clinic and medical equipment, therapeutic trainings and resorts. Whether our clients are looking for prospects of opening a wellness or therapeutic facility, or they need an equipment for any of it, 7D International is glad to be the reliable and competent partner.

As previously mentioned, we are constantly expanding and looking for new opportunities and niches to create a complete model and to cover all the possible aspects of human experience. We do believe, that our strategy will lead us to creating a new level of quality of life not only for the Arab region, but also for people all over the world.

Areas of contracting and consulting:

- Healthcare
- Resort facilities planning and contracting
- Leisure activities
- Resort zoning and equipment
- Clinic and med services
- Wellness facilities supply
- Medical food supply
- Laboratory equipment
- Clinic and medical equipment
- Therapeutic trainings and resorts

PROJECTS

KING ABDULLAH INTERNATIONAL GARDENS

King Abdullah International Gardens should be an important international point connecting culture and human knowledge with entertainment and social life. On the symbolic shape of two moon crescents, there are the exhibition spaces and art galleries of international recognition, that meet business-catering centre, connected by little gardens with the possibility of relaxation and friendly encounters.

KING ABDULLAH PARK FOUNTAIN

The park is situated near Prince Faisal bin Fahd Stadium and was built as a venue for heritage exhibitions and recreational activities during the holidays. It consists of a pedestrian corridor, surrounded by lush greenery and illuminating lamps mounted on poles.

RIYADH 2020

The design is inspired by nature and birth of new life – the desert is gradually transforming into a centre of life, entertainment, relaxation and education. A butterfly, a caterpillar, a flower, a pod cocoon, water, the sun – all of these are symbols representing the design of particular buildings supported by an unmistakable originality of the design complemented with their functionality.

RIYADH EYE

7D International is going to construct a giant observation wheel in Riyadh, an amusement structure that is familiar in its shape to a spaceship and a water drop. From the moment, when our guests buys a ticket, the interaction will begin.

7D WORLD FOR KING SALMAN

Original architectural concept, according to which a massive building in the shape of a mythological sea creature is envisioned in the middle of the park. Now it is important to supplement the main concept with theming and storylines for the zones and their components.

7D RESORT

Experience the natural glamour of translucent turquoise waters and Florida's beaches at 7D Resort. There visitors could discover a stylish tropical paradise blending South Florida's coastal cool vibe and luxury. At Florida visitors could relax in affordable resort, which includes full-service hotel, shopping centres and restaurants.

KING ABDULLAH PARK FOUNTAIN

The King Abdullah Park is situated in Malaz, the centre of Riyadh. It covers an area of 318,000 square meters with a green cover of 150,000 square meters. There are five main entrances in King Abdullah Park and it includes several gardens, children's parks, rest areas for families, sports areas, walkways, seating areas, and a restaurant as big as 1,700 square meter.

Other attractions include among others: a large lake, a dancing fountain equipped with laser technology, amphitheatres, an open area for conducting shows and events and a Kingdom of Saudi Arabia flag post 37 meters high. The park also houses a building meant for VIP visitors. Prince Khalid bin Bandar opened the park with much fanfare, showcasing the giant fountain and its colourful lasers.

The park is situated near Prince Faisal bin Fahd Stadium and was built as a venue for heritage exhibitions and recreational activities during the holidays. It consists of a pedestrian corridor, surrounded by lush greenery and illuminating lamps mounted on poles.

KING ABDULLAH INTERNATIONAL GARDENS

7D International had a spirited idea to build a marvellous project over the desert. 7D International got started to embody a beautiful vision – King Abdullah International Gardens. This place should be an important international point connecting culture and human knowledge with entertainment and social life. On the symbolic shape of two moon crescents, there are the exhibition spaces and art galleries of international recognition, that meet business-catering centre, connected by little gardens with the possibility of relaxation and friendly encounters.

The place is close to an important traffic thoroughfare connecting the capital of Saudi Arabia with the south-west part of the country and significant cities- Mecca and Jeddah. This communication brings a good accessibility of the centre for the inhabitants, but on the other hand, the traffic has a lot of negative effects in the form of noise and air pollution. Therefore the study proposes to create construction adjustments in the places of meetings and national holidays which would shield this place from the negative effects – covered tribunes and brick separation walls.

At the same time, separation is understood symbolically as a detachment of the centre from the built over area of the capital, shifting behind the city agglomeration. The socio-cultural centre is modelled as an independent town, where individual buildings create a network of streets and alleys completed with garden corners with water elements. The buildings of the art galleries, restaurants and shops are single and multi-storey ones, some of them are connected by bridges and allow the visitors to move quickly and relax quietly. The large exhibition areas designed for bigger events are, on the other hand, closed and allow peaceful mind concentration, detached from the bustle of streets. In the tips of the crescents are smaller restaurants, business spaces and spaces for management and maintenance of the centre.

The tower is creating the centre of the area and its imaginary top is supplemented with a lookout restaurant which completes the communication level with the visual connection of the area and the capital. The tower has a view of the capital city and at the same time is visible to it and thus gets the attention of the visitors. The visitors walking through the centre is led by the trail of former river bed through the green, the living areas of art, exhibition and shopping centre and to the possibility of getting up the tower, where they can enjoy the view of distant landscape and the capital city.

RIYADH 2020

The design is inspired by nature and birth of new life – the desert is gradually transforming into a centre of life, entertainment, relaxation and education. A butterfly, a caterpillar, a flower, a pod cocoon, water, the sun – all of these are symbols representing the design of particular buildings supported by an unmistakable originality of the design complemented with their functionality.

The landmarks of the whole compound, for example the shopping mall and the luxury hotel, which will be located along the main street King Fahad Road. These buildings should create an optical barrier for the compound and thus our design has the shopping mall arched in its middle part and creates a kind of an entrance gate. Into the whole area with beautiful views through it. We assume to lead the Olaya street under the ground level and thus create a pedestrian zone with cafes, restaurants etc. adjacent to other multipurpose buildings with retail areas, areas for sports, relaxation and entertainment. Leading the communication under the ground level bringing the supplies of the buildings to the basement level and therefore none of the buildings has an unattractive façade.

The axis of the area follows the entrance gate as a pedestrian zone with buildings symbolizing traditional Arabic bazaar and a culture house, ending with exhibition halls. At the same time the area is divided into individual functional units. The left side contains buildings of the Mosque, the hotel with congress halls connected with a nearby exhibition area and we assume to use the area behind the hotel for individual family accommodation for the visitors of the whole compound.

The right side along the main pedestrian way is considered as a sport and relaxation zone and contains a building with an indoor golf course, technical facilities and other sports facilities. The remaining is assumed to be a golf course with natural footpaths and creates a large outdoor sports and relaxation zone. Regarding the increase in the traffic the main capacity of the car parks is situated in the basement under particular buildings. Additional car parks are located on the ground level along the perimeter of the compound and a larger capacity of car parks is also assumed behind the multipurpose buildings for sports, relaxation and trade.

RIYADH EYE

7D International is going to construct a giant observation wheel in Riyadh, an amusement structure that is familiar in its shape to a spaceship and a water drop. From the moment, when our guests buy a ticket, the interaction will begin. The Riyadh Eye will be the world's largest observation wheel, offering its visitors breath-taking, panoramic views of the city. There's also a wide range of shops, restaurants, activities and facilities.

We mainly focus on three areas: the discovery, the ride and the return. Upon reservation, one must choose the type of virtual journey they wish to observe, as each single or double-storey capsule has a different theme relating to history, culture, or the environment. The whole concept of the observation wheel isn't new, but the concept of 7D International combines design with engineering to create a fully integrated virtual world.

The design creates an active learning environment for visitors, with the aim to create a significant memory and impact on Arabic culture. We create a new fascinating project of entertaining environment for Arab regions, using the most modern technologies, that is comparable with top attractions around the world.

7D WORLD FOR KING SALMAN

7D International will create an original architectural concept, according to which a massive building in the shape of a mythical sea creature is envisioned in the middle of the park. Now it is important to supplement the main concept with theming and storylines for the zones and their components. Our intention is to add other animals to the existing Octopus concept, such as scorpions, camels, fishes and even mythical dinosaurs or fantasy creatures. This animals can be divided in several groups which will form basis for theme zones: Desert Animals, Water Animals, Tropical Animals, Prehistorical Animals and Arctic Animals. The main theme will be the Fantasy Creatures Zoo with rooms to incorporate the local Saudi Arabian stories and myths.

7D RESORT

— RESIDENCE / MALL —

7D RESORT

Experience the natural glamour of translucent turquoise waters and Florida's beaches at 7D Resort. There visitors could discover a stylish tropical paradise blending South Florida's coastal cool vibe and luxury. At Florida visitors could relax in an affordable resort, which includes full-service hotel, shopping centres and restaurants. Unspoiled natural surroundings, beautiful landscapes, championship golf sites, unique shops, abundant history and endless aquatic adventure are a credit to Citrus County.

U.S. Route 19 & 98
Citrus county, FL, USA

Our resort will be ideally located just near Chassahowitzka River, Chassahowitzka Bay and Crystal River. Through this visitors could savour oceanfront dining and discover an endless variety of resort activities ideal for family vacations and groups seeking a distinctive Citrus County setting for meetings and special events, as an afternoon kayaking through the warm waves of the Atlantic.

7D Resort is ready to personalize your vacation with the activities and amenities you care about most. From pampering treatments at our full-service SPA, shopping and dining to fishing excursions will ensure your stay in Florida offers the perfect blend of adventure and relaxation.

Florida is renowned for its multitude of vacation spots and natural attractions. It offers the exotic appeal of a tropical island getaway with the proximity and affordability of a traditional American vacation.

7D Dream form, which is made with BotaMedi, provides an excellent Seanol medicines and cares about creating a healthy life for people all over the world. We are inspired to support people in feeling great about themselves in being spry and healthy in everyday life. We produce and supply Seanol medicines to create a healthier lifestyle as well as mental and body regeneration.

Our vision is to create medicine that will support people in living healthy and having balanced live. Seanol has natural ingredients to help recuperation of body and mind. Our products are exclusive, healing and rejuvenating.

We think that in our times we face a lot of stress, pressure, work and diseases. That is why Seanol medicines not only offer the opportunity of body regeneration and rejuvenation but also encourage our physical growth.

Seanol uses algae remedies in the prevention and treatment of disease. It is one of the most natural forms of medicine and, from a global perspective, is still the most prospective form of medicine practised today. Algae's substances are used to restore the health of those parts that have become weakened. As the body becomes strengthened its intuitive and sophisticated mechanism of healing is restored and health is regained.

What is Seanol

Seanol is suitable for everyone, for any age, delivering a safe, effective and research-based approach to healthcare. Seanol is an extract of a deep sea brown algae called Ecklonia Cava, which is found in the oceans of Japan and Korea. It is an organic complex of unique aquatic molecules and it contains chemicals that work as antioxidants. These chemicals prevent damage to the body's cells that can lead to cancer and other diseases.

Ecklonia Cava extract provides powerful support for general health and cholesterol level. It helps boost alpha waves which are associated with mental agility; soothes stiff joints, boosts energy and increases circulation. Due to its properties, this extract has often been called a super antioxidant. Anti-inflammation is very important for the recovery from the degenerative disease.

Seanol found from brown algae, has very special properties for improving the cellular health. It can reduce chronic inflammation without side-effects and also increase blood circulation power. Furthermore, there are lots of research reports regarding that this substance is very powerful to protect and recover the human body from the degenerative disease.

Seanol benefits

This extract improves circulation as it fights free radicals that are toxic for smooth muscle arterial cells. This is very important because it helps keep arteries open, become relaxed and healthy (healthy blood pressure is critical for our overall health).

It also protects the brain from harmful free radicals and some evidence also suggests that it stimulates the production of certain neurotransmitters that allow us to remember and learn.

More extensive list of benefits is as follows:

- Naturally promotes healthy circulation and blood flow
- Improves cholesterol level
- Weight management
- Diabetes control
- Memory improvement and general brain health
- Keeps joints healthy
- Reduction in inflammation
- Boosts energy levels throughout the day
- Helps battle against signs of aging and age-related health problems

We provide Seanol medicaments, as:

- Health & Energy Drink (for energy and concentration enhancement)
- Medicinal Foods (for brain and cardiovascular health, diet, anti-aging and for cancer treatment support)
- Functional Cream & Cosmetics (for relief from pain, enhanced sport performance, skin health)
- Toiletry (for skin and oral)

As Safe as Food, Higher Efficacy than Drugs
 Research costing more than \$70M, has revealed powerful health benefits of SEANOL® especially in age and lifestyle-related chronic diseases.

Is "Age Reversal" Now Possible?

- Approved as an NDI (New Dietary Ingredient) by US FDA in 2008
- Approved as a New Functional Ingredient by Korea FDA in 2011
- Super Anti-oxidant: Up to 100 times more powerful than "land-based" anti-oxidants

7DREAM DRINKS

During intense exercise and work the human body becomes dehydrated, tired and also drained of ingredients such as vitamins, carbohydrates and electrolytes. Our health energy drinks are based on a unique natural algae and professional receipt. Due to the nutrient elements 7Dream health energy drinks not only satisfy organism needs, quench thirst and twist, but also boost body energy, increasing endurance and mind power at once.

Energy

7Dream Energy provides the body with energy through algae formula, monosacharides and guarana extract. The natural, innovative concept, which provides consumers with vitamins and minerals in a ready to drink form. This drink enriched in vitamins and micro elements supports the immune system, provides pure power for hours and de-stress organism. After trying a sample of algae extract drink consumers notice physical recovery and feel better.

Woman +

Women have become a huge consumer group of nutrient products, looking for dedicated products and precise satisfaction of their needs. To emphasize the uniqueness of products like women, especially woman+, we have created a product range for them. 7Dream Woman+ provides the necessary vitamins, algae, collagen, L-carnitine and other unique components to support the body, metabolism and boost energy. Furthermore the drink could be applied as a safe and natural alternative for relief menopause symptoms.

Vitamin

7Dream Vitamin drinks contain protein, calcium, magnesium, zinc, vitamins C, E, A, B12 and E and amino acids to balance the body and energy. Furthermore, the main ingredient- algae guarantees bone health, better concentration and enhancing immune system. Also the drink supports energy metabolism and nourishes body and mind.

Brain concentration

The specially developed algae formula has a positive impact on the brain. In addition 7Dream Brain drink is enriched with magnesium and potassium, which improves electrolyte and helps with proper functioning of the mind. Other groups of vitamins have a big impact on brain concentration and helps to focus in efficient way. Furthermore this drink is a natural energy boosting supplement.

Cardio

Vitamin drink, through which your body receives 100% of daily demand for particular vitamins/minerals. Apart from the vitamin function, it also helps to support cardiovascular function. This is the exclusive drink which through a unique composition of vitamins and micro elements contains a daily amount of particular nutrients and minerals to prevent and reverse heart diseases and stroke.

Man

Algae formula helps replenish vitamins and helps to provide energy for work of the muscles. The ultimate men's health formula is intended for active men. The drink 7Dream Man contains nutrient optimizer for men that helps to potent their power, providing to the body all nutrition it needs.

Pure

Tired consumers are increasingly often looking for products without unnecessary additives such as sugar, dyes or flavourings. 7D Pure drink is specially created for them. It contains unique extract from algae, which is a natural cure for chronic fatigue syndrome. The formula boosts immune system, enriching body and mind by set of multi-functional vitamins. This drink beats chronic fatigue syndrome and de-stress at once.

PARTNERS

ATELIER SIMONA

CZECH REPUBLIC

Since 1992 Atelier Simona company has successfully realized visions, wishes and ideas of its clients. You may find its projects all over the North Moravian and Silesian region. Founder of Atelier Simona- architect Roman Kuba successfully links up to long-standing family tradition of original architectural creation and honest building craft.

Family tradition of building development continues in the work of the architect Roman Kuba, who since the very beginning of his activity proves himself as exceptional, strong, vital individuality who intentionally avoids strictly rationalistic building concept and he focuses on organic architecture, being inspired by nature as a model of perfect structure, organization and beauty.

In many reconstructions as well as new buildings of bank subsidiaries, administrative buildings and family estates, Roman Kuba's works with architecture, bending line, irregular curve or curvature, sometimes with many angled ground plan derived from natural crystal structure.

Atelier Simona focuses on buildings of commercial and public character which addresses by their original architecture, used materials and well considered dispositions.

Cooperation with significant artists and sculptors are very important to Atelier Simona and it is that what makes it really an original artist company. The company provides services in: architecture, projection, engineering, technology, realizations and consulting. Atelier Simona has very impressive portfolio, where you can find a lot of projects in different studies and locations. Their area of experience is Czech Republic and Arab Countries, but you can also find their projects in Egypt.

ARCH DESIGN

CZECH REPUBLIC

Arch Design is a member of Arch Design Group. It is a Czech Republic-based architecture design company, working with a civil engineering and architecture design for the past 20 years with a range of over the 2000 clients. They are architects and civil engineers whose intention and passion is to bring life to every building.

The first aspect of the Arch Design competency is a master planning. Arch Design's partners are the city development and government authorities, municipalities and regions and Arch Design offers them preparing urban development plans as well as documents for zone plan amendments and engineering.

The second service available at Arch Design is an Architectural Study. They will propose a concept for the project, starting with an initial study and ending with a 3D model of the building with realistic visualization, following by the careful documentation and calculations, such as: summary of sizes, spaces and the cost estimate for the client's considerations about project feasibility.

Detailed design and design documentation is the next aspect of the Arch Design services. They provide detailed design with verified and elaborated details prepared by senior designers, which makes construction more efficient and gives better cost control over it.

Arch Design provides architecture design and project documentation for buildings in the following segments: residential, offices, retail, manufacturing, schools, health care, polifunctional buildings, city planning and many others.

VORAN HOLDING

AUSTRIA

Voran holding is a big community of industrial companies, based in central Europe. During the last 80 years it has been constantly improving their technologies, opening new perspectives and inventing new approaches to the production and service solutions. It is widely respected for its professionalism and quality. There are some sub-units of Voran Holding, such as:

- Voran plant construction is an international suppliers of a complete range of innovative and sophisticated turnkey solutions for slaughtering plants and cold storage room management systems.

- Voran facades is a company, which provides its customers with metal structure solutions for technical and architectural purposes.

- Voran machinery concentrates on manufacturing of beverage production line like fruit juices. It pays an exceptional attention to the knowledge of production processes and quality influences, hygiene conditions and technology.

- Voran manufacturing is a modern and developing company that supplies enterprises of all dimensions. It offers complex supply partnership, on-time delivery provided by great workflow logistics, complete installation and machinery manufacturing.

Steiner Bau GmbH is a construction company from Austria with headquarters in Heiligenreich, which belongs to the Voran Holding. Also Projektinvest Bauträger GmbH is another Austrian company from Voran Holding with specialization in construction. The last partner of Voran Holding EBK Reiter GmbH that is responsible for the sustainable, ecological and cost-effective energy systems and technologies.

CIVIL TEAM ENGINEERING

AUSTRALIA

Civil Team Engineering is a civil engineering independent contractor with its primary concentration in constructing projects of development and infrastructure. The area of influence of Civil Team Engineering lies in Austria and abroad. It provides services for both housing and municipal buildings projects. Total turnover of project finance is amounted at \$25 million.

Established in 2006, the company was founded in Murwillumbah, northern New South Wales, by Tom Rayner, Sally Masters and Garry McInnes, who had previously worked on a range of projects together.

This company has never been afraid of complex projects on sites with hard access, isolated and remote areas, or unique projects, like airport construction, reconstruction and maintenance. Whether the project is challenging or regular, the team of Civil Team Engineering is always committed to deliver the best quality of construction and services, accomplishing timing and budgeting obligations. They make sure, that the customers receive most benefits from their cooperation. The company provides servicesin: weir, water/ sewerage reticulation, bridge and road infrastructure, bridge replacement, pavements, earthworks, drainage, slope stabilization, airport construction, upgrade and maintenance.

PARTNERS

EPS CORPORATION

UNITED STATES

EPS Corporation is a United States based global systems integrator, providing contracts in different areas of services to both government and nongovernment entities. Their objective is to provide their customers with quality and cost-effective products and service contracts in the following: training, fielding & logistics, IT & information management, engineering & Technical Support, Communications Infrastructure, Maritime Services and Alternative Energy Systems.

In the area of Training, Fielding and Logistics EPS provides services in a full range of professional, administrative, and personnel support services for all phases of mobilization, demobilization, day-to-day operations, and assistance to states during natural disasters.

In the area of IT and Information Management EPS is competent in providing services and products in Helpdesk Services, which is implemented by 24/7.

Engineering & Technical Support section of EPS Company's services is concentrated on technical competencies in developing solutions for the broad range of customers' requirements. EPS provides also services in Communications Infrastructure and related support services to federal and commercial customers on a worldwide basis. Furthermore, EPS has the ability to manage design and construction team to assist in taking advantage of the latest techniques and technology.

EPS is performing a wide range of duties including training support; installation, field service / forward training support; logistics support; equipment testing; and software development to foreign partners globally, anywhere in the U.S. Department of Defense's EUCOM, AFRICOM, SOUTHCOM, PACOM, CENTCOM and NORTHCOM.

INTRAS CONSULTING

CZECH REPUBLIC

Intras Consulting, a.s. is a company established in the Czech republic and provides professional accounting and payroll services, tax processing and IFRS/USGAAP reporting.

MPS

NETHERLANDS

MPS meat processing systems is a global provider of automated slaughter lines for pigs, cattle and sheep, cutting and deboning lines, intra-logistics systems for the food industry and industrial wastewater treatment systems. All the range of services is backed with a 24/7 helpdesk service.

The organization of MPS is divided into strong market-oriented business units: MPS Red Meat Slaughtering, Butina, Durand International, MPS Food Logistic Systems, Aqua Industrial Water Treatment, MPS Service and Spares. These six business units are worldwide-oriented and active in the market with an experienced marketing and international sales organization. The business units are supported by a single general and technical service company for the operational implementation, which guarantees a uniform and high-level project implementation and an efficient production.

MPS is a well-known and reliable company with a wide range of a slaughter systems products. They offer slaughter lines for pigs, cattle and ships; stunning procession, including electric and CO2 stunning systems; blood procession, cooling and dispatching.

As a supplement to the MPS slaughter systems and red meat production, MPS meat processing systems also offer a cutting rooms services and products. As a part of this sector there are cutting and deboning lines, blade bone removers and logistics and traceability.

MPS Food Logistics Systems provides a full range of logistics services. That includes project development, specialization and a complete system integration. Also MPS Food Logistics Systems provides a full range of logistics services.

PARTNERS

BULK HANDLING SYSTEM

UNITED STATES

Founded in 1976 and headquartered in Eugene, Oregon, BHS designs, manufactures and installs processing systems tailored to sort material and extract recyclables from waste streams. BHS's history of pairing innovation with common sense has enabled thousands of companies to literally cut through the clutter. From the start, BHS gained rapid acceptance as a prominent supplier of functional, high quality conveying and screening equipment for the forest products and power generation industries – complete systems that featured the industry's only inline screening.

Bulk Handling Systems (BHS) designs, engineers, manufactures, and installs unparalleled sorting and handling systems throughout the world for the recycling, solid waste, wood products, and power generation industries. BHS custom-designed systems at material recovery facilities (MRFs) efficiently extract recyclables from a variety of waste streams at recovery rates in excess of 99%, greatly minimizing the residue that hits landfills.

BHS leads the industry in technology innovation, holding numerous patents for equipment and system designs. BHS' commitment to innovative design and engineering, quality manufacturing, exceptional customer service, timely delivery and long-lasting, efficient systems contribute to the company's strong reputation and success. BHS Bulk Handling Systems is an international holding, consisting of four companies: Nihot Air Separation, NRT Optical Sorting, Zero Waste energy and a daughter company BHS Europe. BHS was the first company to create the single streaming municipal solid waste sorting system in the USA, a blueprint that defined the industry. Nowadays BHS is a leading company in a processing of services and products of the municipal solid waste sorting and recycling.

NIHOT

NETHERLANDS

Nihot Recycling Technology was established in 1945 and started their business by producing air ducts for small wood furnaces. Today Nihot is a proven market leader in the supply of solid waste air separation technologies, systems and components, using controlled air. Also, Nihot is an expert in development, design, manufacture and installation of air technology components and systems for separation and / or up – grading of waste material. Nihot's air technologies reflect a superior reliability, offering the highest waste separation efficiency. From consulting, developing, designing and manufacturing to delivery, installation, commissioning and operator training, it's all in-house expertise. Since no two customers and installations are the same, we design all of our systems uniquely to the individual needs of our customers.

Each type of product or system has its own unique advantages and characteristics, such as the Windshifter's proven operational efficiency and the Drum Separator's high capacity and reliability.

Since its beginning Nihot has always been very active on international markets. This has outgrown to a current situation where we are exporting more than 90% of our total business. From the United States of America to Australia and almost every country in between we have numerous of Nihot installations in full operation. The reason of this success is the flexibility of the Nihot equipment combined with the highest quality standards. Next to that we are very familiar with the local demands and circumstances. Not in the least because of our many local partners in every corner of the world.

NRT

UNITED STATES

NRT is a recognized world leader in automated optical sorting of materials for recycling, holding more than 35 patents in the field with a talented staff of scientists, engineers and technicians. During the past 30 years, NRT has developed dozens of technologies and advances for use in Near Infrared, X-ray and Color Line-Scan Camera Sorting applications and systems.

Utilizing top-of-the-line technology and components, their equipment features scan rates of up to 10,000 scans-per-second and boasts industry leading capture rates. BHS incorporates NRT's optical sorting technology into material processing systems, providing customers with state-of-the-art, high-speed infrared detection and precise color sorting capabilities. These systems sort containers at industry leading efficiency and purity rates.

During the past 30 years, NRT has developed dozens of technologies and advances for use in Near Infrared (NIR), X-ray and Color Line-Scan Camera Sorting applications and systems. Today, NRT owns or is the exclusive licensee of 29 U.S. patents and five foreign patents covering these disciplines, with others pending. Utilizing top-of-the-line technology and components, our equipment features scan rates of up to 10,000 scans-per-second and boasts industry leading capture rates.

NRT equipment is designed, manufactured and fully supported from its headquarters in Nashville. Intellectual property is developed in-house and owned by NRT, providing the control and excellence needed for second-to-none sorting performance. By controlling all aspects of technology, components and the manufacturing process, we know that our equipment will meet your performance needs now and in the future.

ZERO WASTE

UNITED STATES

Zero Waste Energy, LLC was founded in 2009 and incorporated in 2010 in San Jose, California, by an experienced group of innovative solid waste industry leaders. They recognized the value in the best use of waste feedstock and the systems needed to sort out high value commodities and to generate renewable energy. ZWE's principal goal has been to design, construct, and operate solid waste handling and advanced composting facilities that optimize waste diversion and the generation of renewable energy in an efficient and environmentally sound manner.

Zero Waste Energy has developed a very deep base of industry and technology experts who work on ZWE projects based upon the specific needs of its customers, making us the ideal project partner with experience, resources and technologies to execute. Our exclusive and/or project-based relationships include "Best-in-Class" Facility Design and Engineering, Waste Sorting and Separation Systems, Anaerobic Digestions and In-Vessel Composting, Renewable CNG, Plastics to Renewable Oil, Compost Marketing and Sales, and Residual Waste Gasification. The relationships with these technology teams have been developed over many years and projects.

Many in the waste industry are seeking "zero waste" or renewable energy from waste. Zero Waste Energy brings real, executable solutions to developers and operators throughout the world. At Zero Waste Energy, we've based our name and our reputation on insightful experience and strong performance, which can be seen in our operating references for all sized operations. We believe it's critical to know where you've been in order to better understand what's possible going forward.

PARTNERS

LS CORP.

SOUTH KOREA

LS Corp. is a global energy corporation based in South Korea, with the main company of LS Corp. and daughter companies: LS Cable and System, LS IS, LS Nikko Copper, LS Mtron, GAON, E1 and yes'co. It is a leader company in the electric power and electronic, materials and energy. LS Corp. is also fulfilling the management of subsidiary companies and strengthening preventive measures before management risk by maintaining the basic responsibility management conditions of subsidiary companies.

The company provides electric power transmission and telecommunication products, including various power and telecommunication cables, switch gear, switch boards, electronic meters, transformers, and power semiconductors; and automation products comprising inverters, programmable logic controllers, intelligent transport systems, RFID/USIN, and green building solutions, as well as LNG/LPG distribution services.

It also offers materials, such as electronic copper cathodes, copper rods/foils, copper tubes, STS pipes, heavy wall thickness pipes, advanced meter infrastructure/reading, energy management systems, communication infrastructures, and ultra capacitors; and machinery and components.

In addition, the company provides renewable energy products, such as photovoltaic/solar thermal products, wind turbine parts, and cables; eco friendly equipment and parts comprising voltage direct current products, super conducting cable and current limiters, submarine cables, and gas insulated switch gears; and automobile parts and solutions, such as electric vehicle parts, including inverters, relays, and EV cables, as well as charging equipment.

AUS CONSULT

AUSTRALIA

Aus-Consult is an Australia-based consulting company, established in 1996. Its main sphere of interest is consulting services including program management solutions for local and international companies undertaking major infrastructure projects.

The company was formerly known as the Association of Consulting Engineers Australia (ACEA), and was formed and officially established in 1952. A redraft of the Association's rules took place in 1962 in order to provide for the changing national character of the Association and to accommodate state-based Chapters, and in 2001 ACEA membership base changed to become an association of business firms.

Also in 2001 Consult Australia launched FutureNet WA and subsequently Australia-wide aimed at supporting younger professionals within the industry. In 2005 the FutureNet Business Leaders Program was launched in NSW, and subsequently to Queensland and Victoria.

In 2010—as a reflection of the changing nature and make up of its member firms, the ACEA changed its name to Consult Australia. This rebrand was followed by a relaunch of the Association's website, and a redraft of the Constitution.

Aus-Consult delivers specialist consulting and program management solutions for organizations undertaking major construction, telecommunications and IT transformational and infrastructure projects. Aus-Consult also provides specialized advice and assistance on Tender Evaluation, Technical, Program Management and successful Commercial Proposals and contract management for varied industries and Technologies.

SCHALLER

AUSTRIA

Since 40 years, SCHALLER® boosts cutting-edge technologies for the meat industry worldwide.

Trust is the only gift that you need to earn consistently. This is exactly what Schaller has succeeded in doing for 40 years as a partner to the meat industry in Eastern Europe and Central Asia, quite simply because this partnership goes far beyond the norm in many ways.

Our main specialism involves combining excellent mixtures of spices with intelligently designed state-of-the-art production solutions. Solutions from a single source that are as unique as the markets where they produce a profit. These solutions are as individual as the wishes of the customers that Schaller implements them for.

However, planning and implementing integrated made in Austria concepts for success is just one reason for our success. Another lies in the close personal and geographical relationship with our customers. With 21 branches in 17 countries, we can be promptly available whenever personal supervision, high levels of investment security, and a dynamic appearance on the market are required.

7D INTERNATIONAL STRATEGY

7D International is a holding company, located in four countries all over the world. 7D International provides almost full service in consulting and contracting on many diverse fields.

Our market participation is ranked in wide industrial, infrastructure and select commercial projects for public and private customers in five continents.

The values that are important for us include honesty, openness, mutual respect and professionalism. We work professionally and reliably. Our tasks are performed with full commitment and all the skills we have. By working in this manner, we satisfy our clients and ourselves. We want our actions to be transparent and legible to the market, both internally and externally.

One of the 7D international's great advantages is a developing ability in every industry simultaneously and tirelessly. This predetermines the strategies of key areas. With the satisfaction and joy from what we do we are innovative and visionary. We both accept, create and develop new ideas and solutions.

ATELIER SIMONA GROUP

CZECH REPUBLIC

7D International provides works of design, project documentation, pricing, placing and marketing items for buildings in all segments. We are ready to help you with any type of consulting including new development, reconstruction or rebuilding work. Notwithstanding, 7D International now specializes in architecture and design for Arab towns and cities, including Green Energy, as well as passive energy systems that does not require energy. One of our most important consultant and architect in this area is our team member world famous Roman Kuba.

The architect Roman Kuba is a founder of Atelier Simona Group Company, that was established in 1992 as Atelier Simona in Ostrava. He also links to long successful family tradition of architectonic realization and building skills. One of his project called The Bird was published in famous Chinese magazine bundpic.com.

Atelier Simona Group has a highly qualified team of experts and professionals: architects, designers, supervisors, graphics, technician of engineering and modellers.
